The screenshot shows a Windows File Explorer window with the address bar displaying the path: Local Disk (C:) > xampp > htdocs > webmap_course01_01oke >. The ribbon at the top includes options like 'Share with', 'Burn', and 'New folder'. The main area displays a list of files and folders with columns for Name, Date modified, Type, and Size.

https://jquery.com/download/

A screenshot of a web browser displaying the jQuery download page. The browser's address bar shows 'https://jquery.com/download/'. The page has a blue header with the jQuery logo and the tagline 'write less, do more.'. A navigation bar below the header contains links for 'Download', 'API Documentation', 'Blog', 'Plugins', and 'Browser Support'. The main content area is titled 'Downloading jQuery' and contains text explaining the availability of compressed and uncompressed files, as well as a source map file. It also provides instructions on how to download the files. A red rectangular box highlights two download links: 'Download the compressed, production jQuery 3.5.1' and 'Download the uncompressed, development jQuery 3.5.1'. Below these links, there is a link for 'Download the map file for jQuery 3.5.1' and a note about the slim build. The page also features a 'SUPPORT THE PROJECT' button in the top right corner and a search bar in the navigation bar.

Downloading jQuery

Compressed and uncompressed copies of jQuery files are available. The uncompressed file is best used during development or debugging; the compressed file saves bandwidth and improves performance in production. You can also download a [source map file](#) for use when debugging with a compressed file. The map file is *not* required for users to run jQuery, it just improves the developer's debugger experience. As of jQuery 1.11.0/2.1.0 the `/** sourceMappingURL` comment is **not included** in the compressed file.

To locally download these files, right-click the link and select "Save as..." from the menu.

jQuery

For help when upgrading jQuery, please see the [upgrade guide](#) most relevant to your version. We also recommend using the [jQuery Migrate plugin](#).

[Download the compressed, production jQuery 3.5.1](#)

[Download the uncompressed, development jQuery 3.5.1](#)

[Download the map file for jQuery 3.5.1](#)

You can also use the slim build, which excludes the [ajax](#) and [effects](#) modules:

[Download the compressed, production jQuery 3.5.1 slim build](#)

Getting started · Bootstrap

https://getbootstrap.com/docs/3.4/getting-started/#download

Download

Bootstrap (currently v3.4.1) has a few easy ways to quickly get started, each one appealing to a different skill level and use case. Read through to see what suits your particular needs.

Bootstrap

Compiled and minified CSS, JavaScript, and fonts. No docs or original source files are included.

[Download Bootstrap](#)

Source code

Source Less, JavaScript, and font files, along with our docs. **Requires a Less compiler and some setup.**

[Download source](#)

Sass

[Bootstrap ported from Less to Sass](#) for easy inclusion in Rails, Compass, or Sass-only projects.

[Download Sass](#)

BootstrapCDN

The folks over at [StackPath](#) graciously provide CDN support for Bootstrap's CSS and JavaScript. Just use these [BootstrapCDN](#) links.

```
<!-- Latest compiled and minified CSS -->
